

LAWN GRID PLATE (30mm)

Available colours:  black  green

It is an excellent alternative to "heavy" (physically and optically) concrete pavement slabs, concrete openwork panels, paving stones, asphalt and other types of paved surfaces. The product is nature friendly, water permeable and almost invisible after sowing the grass. Recommended for intense traffic parks. Provides UV stabilization that prevents degradation by sunlight. Our products meet the requirements in accordance with PN-EN 124 and PN - EN1433. Product in load class A15 and B125.

eco friendly

recyclable

uv resistant

- ▶ The grid is can be used as: garden grid and for a parking place
- ▶ Stiffening of the grille's sockets allows simple laying on the ground or dry ballast
- ▶ A binding truss for better stiffness
- ▶ The grid can be supplemented with various materials depending on the application:
 - for the grid, the filling can be used different material.
 - for garden: sand and gravel
 - for parking: debris, small stones
- ▶ Made of durable raw material, resistant to load (demonstrated by tests)
