Installing Your New ScanSeat Toilet Seat

please read the manual carefully before installing the toilet seat

Assemble the bolts and hinges and insert them into the mounting holes in the toilet

Lift up the hinge base and tighten the screws loosely with a screwdriver

Position the locking bolt correctly
Click the seat onto the hinges
Close the seat and adjust to desired position, then open and remove the seat

Tighten the bolts firmly and make sure the nut is positioned correctly
Remove the seat and place the cover cap on the hinge base and press in place
Click the seat back into place

Enjoy your new quality toilet seat.

Easy push

Easy lift
